PROFILE

Full-stack web developer who designs, builds and deploys complete products end to end, from the database to the interface. I have five live applications in production, including a React web and Android app with an automated test suite, an offline-first Progressive Web App with translations in 81 languages, and a teaching platform built for working driving instructors. I also bring web design, graphic design and SEO, so the things I build look good and get found. Looking for a remote or hybrid full-stack or front-end role.

SKILLS

Front end	JavaScript (ES6+), React, HTML5, CSS3, Tailwind CSS, Three.js, GSAP, responsive and accessible UI
Back end	PHP, Python, Node.js, REST APIs, Socket.io
Data	MySQL, SQL, Supabase, localStorage and offline-first storage
Mobile	React Native, Kotlin with Jetpack Compose, Capacitor
Tools	Git, GitHub, Vite, Render, automated testing with Node's test runner
Also	Web and graphic design, technical SEO, digital marketing

PROJECTS

Tax Return Helper · Web + Android app

Live · Code

HMRC Self Assessment helper for self-employed people, in English and Bengali.

- Daily income, expense and mileage logging, with Income Tax and National Insurance estimates and box-by-box figures for the GOV.UK return
- One React codebase shipped as a website and an Android app with Capacitor; PDF export with pdf-lib
- Tax engine covered by automated tests

`React 19 · Vite · Tailwind CSS 4 · Capacitor · pdf-lib`

Qunor · Progressive Web App

Live · Code

Free app for learning to read the Quran: 114 surahs, word-by-word audio from 44 reciters, qaida and tajweed lessons, translations in 81 languages.

- Installable and fully offline, with no account required
- A Python script verifies the source text on every deploy

`JavaScript · PWA · Service worker · Python`

Driving Teaching · Web app

Live · Code

Teaching platform for UK driving instructors and their pupils.

- 37-session teaching route, 30-lesson curriculum with skill ratings, digital mock test sheet with live pass or fail, per-pupil progress and backup
- No build step and no server: deploys instantly, and pupil data never leaves the device

`JavaScript · Tailwind CSS v4 · HTML · localStorage`

ParaLine

Live · Code

Paraphrasing tool with six styles, line-by-line output, an offline mode and an optional Gemini AI mode.

`JavaScript · Gemini API`

Appointments

Live · Code

Private appointment tracker with voice notes and custom reminders, on the web and as a native Android app.

`JavaScript · Kotlin · Jetpack Compose`

This portfolio · 3D website

Live · Code

A scroll-driven 3D alpine valley built in code with Three.js and custom GLSL shaders, with GitHub repositories loaded live from the API and a lighter scene on phones.

`Three.js · GLSL · GSAP · Vite`

IN PROGRESS

Pingo, a real-time chat and video calling mobile app (React Native, Node.js, Socket.io, Supabase, Agora) · **A to Z Islamic Learning**, a multilingual 3D learning platform (Three.js, PHP, MySQL)
